The value of securities may go down as well as up, depending on the performance of companies and general market conditions. The value at which securities in certain companies can be liquidated may differ, sometimes significantly, from the interim valuations. Investment in securities of certain companies may be less liquid, more volatile and subject to greater risks than securities of other companies. Investment in emerging markets may increase the volatility of the Fund's Net Asset Value, and accordingly, an investment in the Fund's Shares may be worth more or less on redemption than their original purchase value. As the Fund may invest in derivatives, such as swaps, it may lose more than the amount invested in such derivatives. Investors in shares denominated in a currency other than the base currency of the Fund may be affected by changes in currency movements. Commentary⁴

Market

The US Federal Reserve cut rates in September, helping equity markets to rally and Treasury yields to fall. Both US and European macroeconomic data was weak, but a low CPI print was a positive for sentiment. Significant new stimulus measures announced by China drove meaningful strength in local equities, while a less hawkish tone from the Bank of Japan was also positive.

In cash credit indices, Investment Grade (IG) outperformed High Yield (HY), and the US outperformed Europe. US IG (C0A0) was up 1.73%, outperforming Europe (ER00) up 1.23%. In HY, the US (H0A0) was up 1.64%, outperforming Europe (HP00) up 1.08%.

In equities, following the Chinese stimulus, the Chinese CSI 300 index rose 21.1% and the Hang Seng rose 18.3%. Other regions posted much more muted performance, with the S&P 500 up 2.1% and the Euro Stoxx up 0.9%.

Performance

In September, all regions contributed positively to Fund performance, led by the US, then Asia, with a small contribution from Europe. At a sector-level, Consumer Discretionary and Real Estate were the largest contributors to Fund performance, while Financials was the main detractor.

The top three single-name contributors were the Chinese e-commerce company Alibaba, the US airline Jetblue, and the US real estate company Welltower.

The top three single-name detractors were the German defense and engineering group Rheinmetall, the US semiconductor supplier ON Semiconductor, and SBI Holdings, the Japanese financial services group.

Primary issuance picked up once again in September, with \$9.4bn of new issues, of which the majority came from the US with \$6.9bn, followed by Asia with \$1.7bn, the Europe with \$800 million.

Positioning

During the month, the Fund participated in the primary market with new issues Jazz Pharma 3.125% 2030 144a, Quanta Computer 0% 2027-29 TWD, and Snowflake 0% 2029 144a. The Fund also increased its positions in Alibaba 0.5% 2029-31 144a and Parsons 2.625% 2029 144a.

Additionally, the Fund reduced its position in Umicore 0% 2025 on re-evaluation of investment potential. The Fund also exited its position in Edenred 0% 2024 at maturity, Super Micro Computer 0% 2029 144a on re-evaluation of investment potential and Snap 0.5% 2030 144a on re-evaluation of investment potential and ESG concerns.

Outlook

Monetary liquidity finds its way to the path of least resistance – generally, financial markets. In September the liquidity backdrop for markets was altered by the 50bp cut in rates announced by the US Federal Reserve and by the initiatives from the Chinese authorities. Coming at the end of the quarter and ahead of the Golden Week holiday the announced stimulus drove Chinese equities dramatically higher during the second half of the month. We anticipate continued volatility as we head toward the end of the year, in particular given the political and geopolitical cross-currents. The investment imperative to maintain balance and diversification in a global convertible portfolio is strong given the potential for the unexpected. We see greatest value in convertibles that balance equity and debt characteristics and that embody equity optionality at a reasonable price. We also selectively own convertibles with more bond-like characteristics that still afford upside potential in the event of equity performance. The convertible opportunity set is strong, helped by attractive valuations, ongoing new issuance and dispersion in returns.

CQS Global Convertible Fund Investment Summary

Investment Approach

- Seeking upside participation in rising equity markets and downside protection (due to the bond floor) in weak equity markets
- Aiming to exploit opportunities in convertibles globally across diverse sectors, geographies and security profiles
- Disciplined investment process underpinned by deep fundamental research with integrated ESG analysis
- Active investment management and benchmark agnostic
- Committed to delivering a Weighted Average Carbon Intensity (WACI) and ESG rating that is better than the Refinitiv Global Focus Index, Net Zero by 2050 and related interim targets including engagement to drive long-term ESG improvement

Security Selection Process

- The Portfolio Manager focuses on individual convertible securities seeking to maximise investment opportunity and expected return asymmetry
- Selected securities continually compete for a place in the portfolio
- Catalysts for portfolio change include: relative valuation shifts, corporate news, new issuance, rating actions, upgrades / downgrades, corporate events, and calls / puts / maturities
- In-house credit ratings are used to evaluate the significant unrated portion of the market to add value

Portfolio Construction and Risk Management

- The Portfolio Manager seeks optimal portfolio risk / reward and diversification by issuer, geography and industry sector with appropriate position sizing
- Strict compliance with risk limits, monitored by an independent risk management team

Risks Involved

- Investments in global convertibles are primarily subject to equity, credit, interest rate and foreign exchange risk
- The Fund seeks to hedge foreign exchange risk using financial derivatives

²Target returns are estimated and net of anticipated fees, expenses and income reinvested. They are based on long-term performance projections of the investment strategy and market conditions at the time of modelling and are therefore subject to change. There is no guarantee that any target return can be achieved. Investors should not place any reliance on such target return in deciding whether to invest in the Fund. Target returns are for illustrative purposes only.

³The CQS Global Convertible Fund (UCITS) a sub-fund of CQS Funds (Ireland) plc was approved by the Central Bank of Ireland on the 12 February 2015 and commenced investment activity 2 March 2015. Class returns are calculated net of all fees and expenses on the basis of a shareholding since inception of such class or, if such class has become dormant at any point following inception, since the first new investment into such class. Individual shareholders may have different returns depending upon the date of their investment. Investors should refer to each specific share class for the actual historical performance of the relevant class; please request full history of data from CQS. Reference Share Class is C USD.

⁴The Fund may have since exited some or all of the positions detailed in this commentary.

⁵ Weighted Average Delta: The delta of each instrument is weighted according to its market value. Cash is included with a delta of zero.

⁶ Average Credit Rating: Positions, including Cash, are weighted according to market value and internal credit ratings are used where externally sourced credit ratings are not available. Cash is rated as A+.

⁷ Weighted Average Carbon Intensity ("WACI") is estimated using scope 1 & 2 available disclosures or proxy estimates based on comparative data from MSCI. For proxy estimates, we apply a waterfall approach which requires a minimum of 10 issuers within the proxy estimate group. If there are not 10 issuers in the proxy estimate group, it changes to a broader category group to increase the number of comparable issuers and continues moving to a broader group until a minimum group size of 10 issuers are obtained or 'sector' level is reached. The order is sub-industry first, then industry, then industry group, then finally sector. Please note that the WACI score does not include hedges for efficient portfolio management purposes

⁸Index is the Refinitiv Global Focus Convertible Index.

⁹ Actual allocations at month-end. There is no guarantee that the Fund will invest in this way at all or do so in the same manner as set forth in this factsheet. Figures may not sum to 100 due to rounding.

¹⁰ Maturity or first put.

¹¹ ESG ratings may not sum to 100% due to rounding. ESG ratings are attributed to issuers using either third party or internal ESG ratings assessed by CQS. The ratings range from AAA-CCC and are based on factors such as climate change, toxic emissions and waste, labour management, health and safety, privacy and data security, corporate governance and behaviour, and remuneration. A waterfall approach is used when assessing the ESG rating portfolio distribution and average rating of the portfolio, whereby (i) if a third party ESG rating is available that rating is used, failing which (ii) CQS' rating will be used. ESG ratings may reflect the subjective opinions of CQS or the relevant third party and may be based on qualitative as well as quantitative data. ESG ratings may be based on unverified third party sources or unaudited financial and non-financial data. ESG ratings are not an opinion of the creditworthiness of any issuer. ESG Rating Analysis: MSCI ESG Research LLC. Please see MSCI Disclaimer at the end of this report.
